Getting recognition for excellence in computational statistics

Scope and Vision

- Journal covers computational statistics in a wide sense, from interesting applications to implementation issues and to algorithmic considerations.

Scope and Vision

- Code and/or data not required for publication, but in many cases available (from authors’ web sites).
- Currently no special infrastructure for distributing code and data, to change in near future.
- When applicable code and data are considered important part of publication, but still not mandatory.

Scope and Vision

- Journal has a software review editor, but not a regular column.
